

Lab Exercise 12

Software Design
Spring 2007

Allen B. Downey

Due: never!!!

12.1 3D Graphics

1. Install VPython by logging in as root and typing

```
yum install visual-python
```

You can test it by running one of the examples:

```
cd /usr/share/doc/visual-python-3.2.9/examples/  
python stonehenge.py
```

The documentation is available from <http://www.vpython.org/>.

2. The examples should give you an idea of what is possible. Choose an interesting one, make a copy, and play around with it.
